SIGN OF PERFECTION

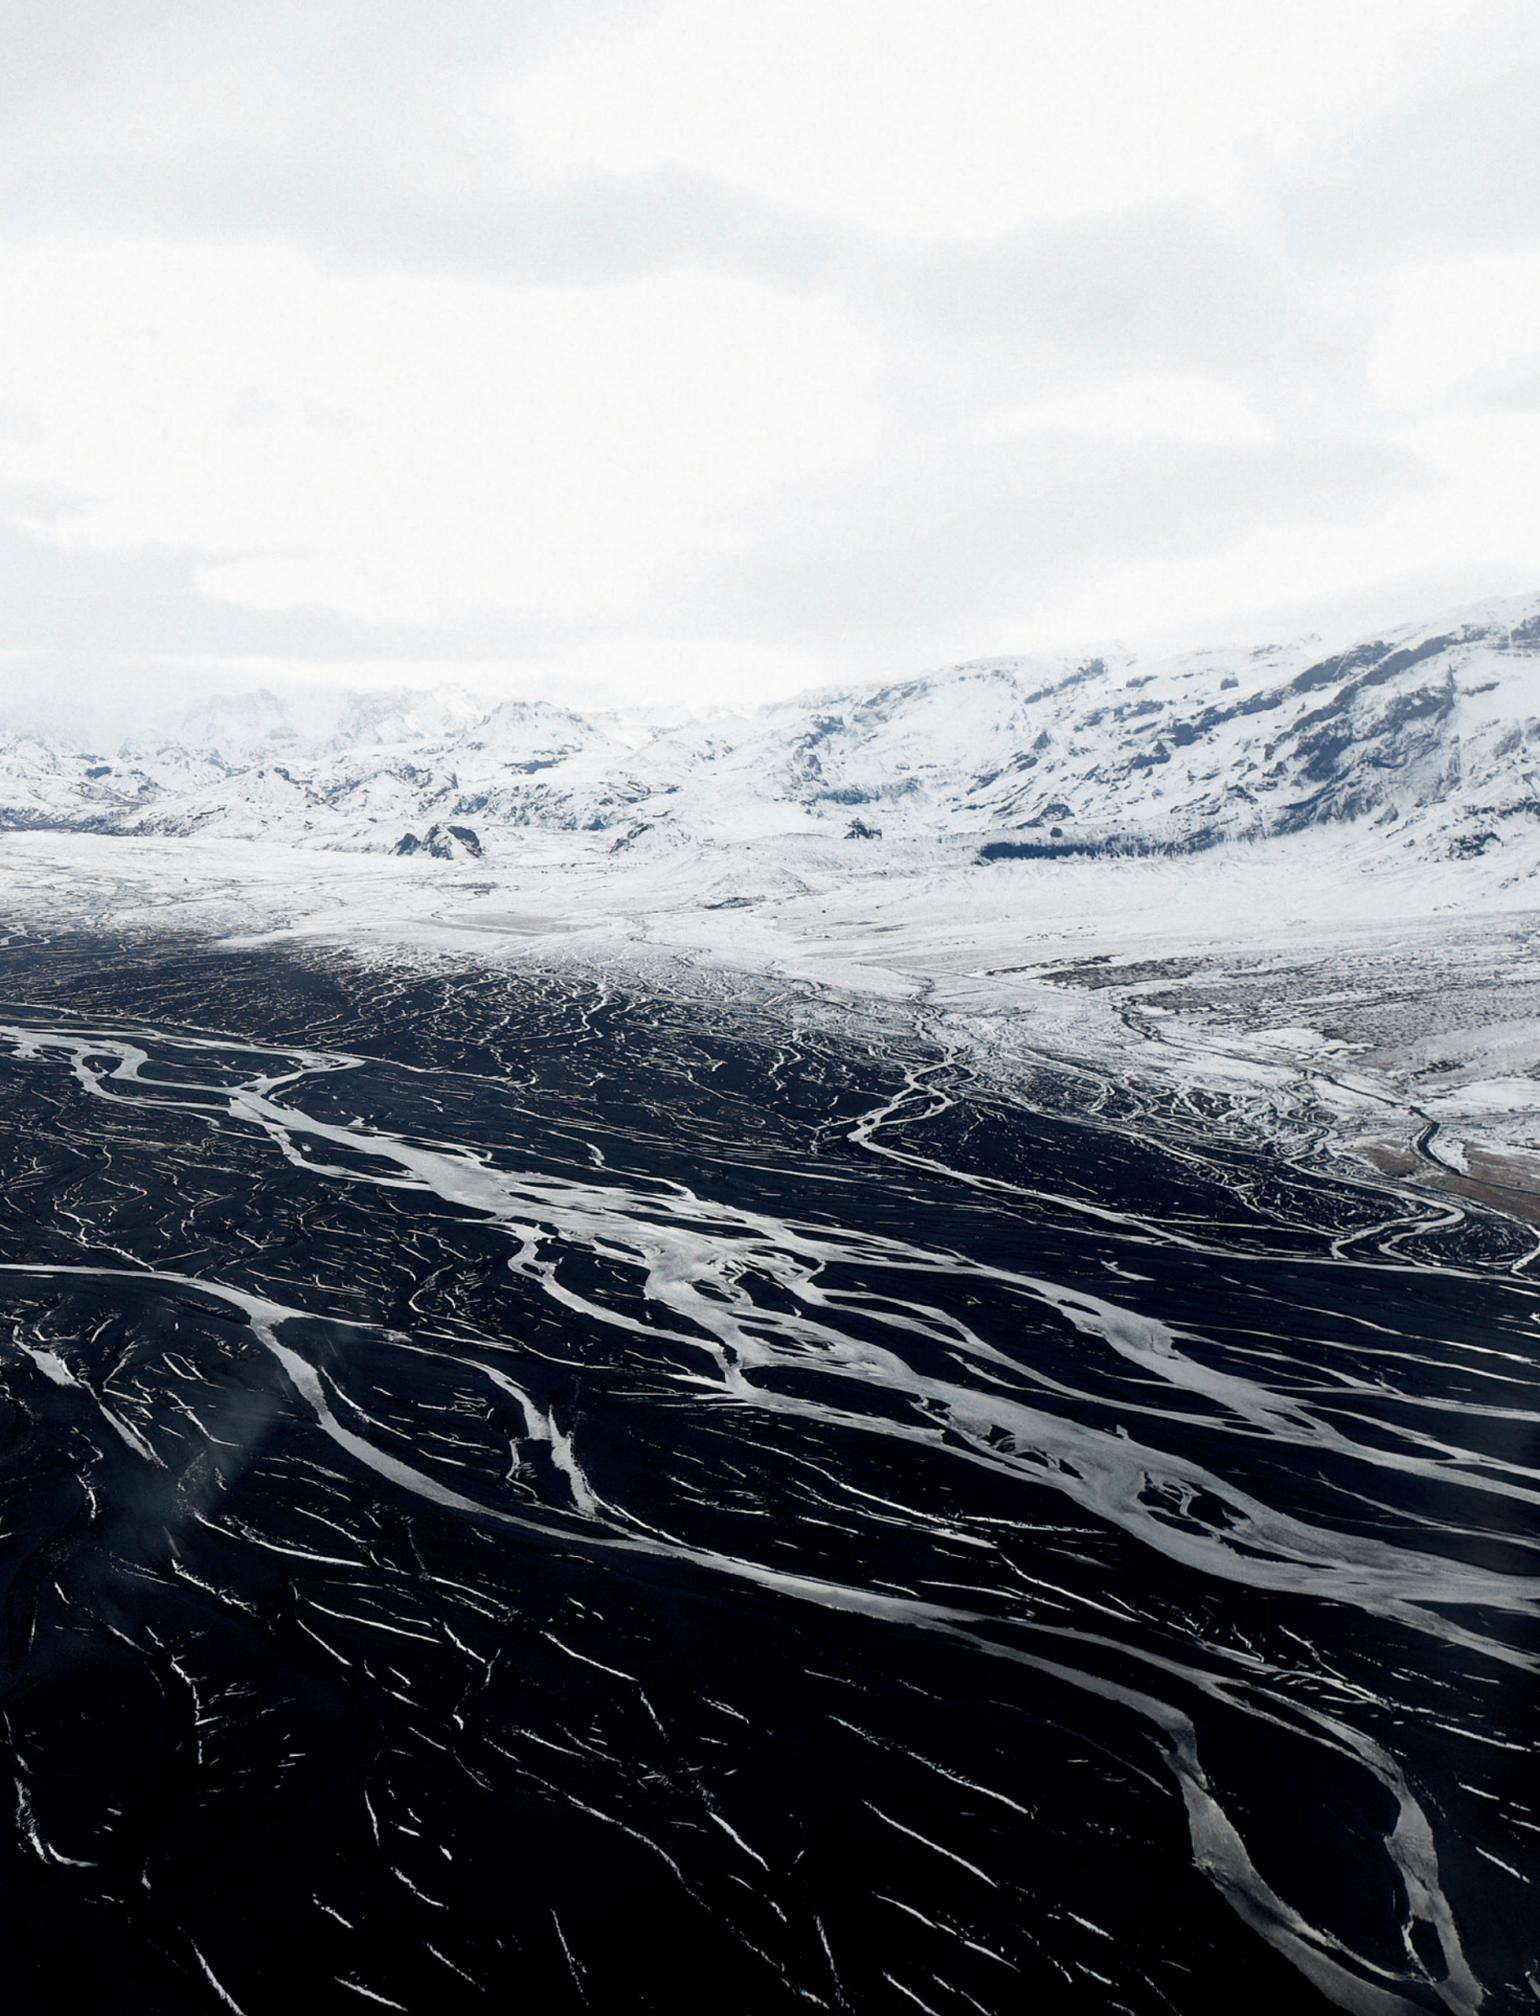

SIGN OF PERFECTION

001 It has been more than 45 years since we defined the mission of COMPAC: imagine, design and create surfaces that inspire peoples' lives and set trends in the world of décor. Today we continue to give our best to become a benchmark for those who love design, appreciate beauty and are looking for something unique.

002 Our Unique collection is inspired in the properties of natural rock, to then exceed all expectations. It is the result of a constant endeavour to offer an innovative product, creating decorative surfaces with unmatched technical specifications.

003 Forty five years is a long time, but we continue to look towards the future, setting and achieving impossible targets while we transform not only the materials we work with, but also the life of those who interact with them.

NOVELTIES UNIQUE COLLECTION™ 2021

New Unique Collection™ products, naturally perfect.
Simple elegance and timeless design.

NEW
UNIQUE COLLECTION™ 2021

UNIQUE STATUARIO™

ENDLESS PERFECTION

Pure, vibrant white with twisting veins in grey tones for a unique, subtle and timeless design. Unique Statuario lends simple, undeniable elegance to any surface.

COMPAC technology and its unique veins mean you can create true and timeless works of art.

UNIQUE STATUARIO GOLD™

ENDLESS PERFECTION

The ochre and golden tones of the Unique Statuario Gold veins contrast subtly with the white background. This union creates a perfect elegance, as natural as stone or gold.

The unique COMPAC technology means you can have the elegance of this stone in every corner of your home.

ENDLESS™ AND ENDMATCH

ENDLESS / The new designs of the Unique Collection™, Unique Statuario™ and Unique Statuario Gold™, express COMPAC's strive for perfection and elegance.

COMPAC adds two designs to its portfolio, with the most highly-valued patterns in the natural stone market. These designs feature an Endless™ effect, one of the most innovative technologies on the market, currently in the patent process.

This technology allows for maximum usage of the slabs surfaces. With this technology we can use as much of the board surface as possible because it is designed with veins that can be linked, matching up perfectly when installing different pieces, achieving an endless pattern.

Flooring and wall covering, Unique Statuario™
ENDLESS™ effect

ENDMATCH

Flooring and wall covering, Unique Statuario Gold™
ENDMATCH effect

ENDMATCH

ENDMATCH / In addition to Endless™, we can also achieve an extremely special Endmatch effect by connecting at least two boards with the same design, turning one of them 180°.

This also gives an endless vein pattern. Installing uncut boards, giving a unique sense of continuity.

NATURALLY PERFECT. Beauty is in the eye of the beholder, but sometimes beauty just stands out.

001 At COMPAC we have been observing nature for 45 years. We admire its shapes, its strength, its endless beauty. Our Unique collection comes from this observation, from our total respect and admiration for the shapes, materials and textures of stone so we can achieve something unique.

002 In Unique, we apply all our expertise acquired over the years to the purest raw materials, ensuring that the end product is even more perfect than nature. Our manufacturing processes lend a series of new features to our stone so they adapt better to peoples' daily needs: impermeability, hardness and resistance. We conserve the original values, improving them with our creativity.

THE POWER OF TALENT

With a look that is so naturally expressive and realistic that we can create compositions with intensities of colour for great elegance and a natural appearance. Textures and finishes that give a distinctively elegant appeal.

TIMELINE

TIMELINE

MANUFACTURING THE FUTURE OF DESIGN SINCE 1975

We are a leading company based in Spain marketing high quality decorative surfaces. COMPAC was founded in 1975 and it was the first Spanish brand specializing in the manufacture and distribution of marble and quartz surface coverings. Today we are a large multinational company with 100% Spanish capital that we have learned to grow while maintaining our flexibility and our independent decision-making spirit.

001 At COMPAC Surfaces our Corporate Social Responsibility (CSR) is deeply rooted; we aim to actively contribute to social, economic and environmental improvement.

002 Following on with our environmental commitment, Unique Collection features a BIO resin obtained from plant-based sources, so we can create a natural and more environmentally-friendly collection.

003 Distinction, responsibility and respect must go hand in hand. That is why the Unique collection is made from plant-based materials, such as high-tech BIO resins, from renewable sources. As verified by the prestigious BIO certificate.

KBIS 2020

⁰⁰¹ At the 2020 KBIS fair, COMPAC won an award recognising it as a sustainable company committed to the environment. COMPAC's environmental commitment has led it to achieve the SUSTAINABILITY AWARD, one of the ten categories of the 30s CHOICE AWARDS which held its 2nd edition at KBIC.

⁰⁰² A panel of three has granted COMPAC the famous award as a sustainable company committed to the environment. The panel highlighted the launch of Obsidiana, a new product made from recycled materials, as well as the sustainable background of the company which has been applying pioneering measures in the industry for decades, such as reforesting its land in Portugal, using renewable energies in its material production or manufacturing processes, recycling water used in its processes, and manufacturing designs with BIO resins.
